

Topic 4 International Relation

KNCV is a member of FECS and of IUPAC. For the latter KNCV is the adhering organisation for the Netherlands. KNCV is also a member of ECTN. Beside this there are no international educational cooperative programs in which the KNCV is active. To stimulate young chemists to participate to international conferences KNCV has a program for travelfunding.

Promotional activities for international chemistry events can be placed on the website and in our journal.
