■ [Important] How to present your poster

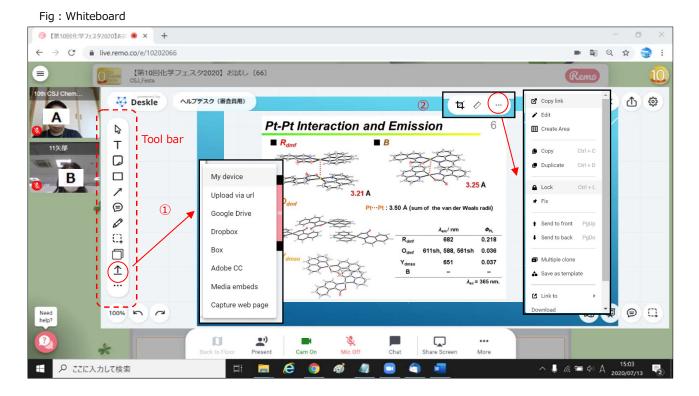

Please use **Whiteboard** in the toolbar to share your presentation data. Data made by PowerPoint or Keynote can not be uploaded on the whiteboard. Those data must be converted into image data (such as jpeg or png). Image data can be either in 1) 1 page in A0 size or 2) some pages in A4. Data on the whiteboard must be locked not to be deleted accidentally by other audiences. Data will be left as it is when you leave your table or even "quit event". After the session, you must unlock and remove all data from the whiteboard for the next presenter.

- ①Uploading data (tool bar on the left)
- ②Locking data (click data and small tool bar comes out)

When sharing Whiteboard, audiences $(A \setminus B)$ whose video is on, will appear at the left side of the screen. Each audience can enlarge data by mouse wheel. It does not affect other's screen.

Presentation time should be within 3 minutes and discussion in 3 minutes. Please try to take more time for your reviewers who can be identified by their login name and icon.
